EDUCATION

University of Waterloo

Bachelor of Computer Science

May 2030

TECHNICAL SKILLS

Languages: Python, Typescript, Rust, SQL, Javascript, Java, C, C++, C#, Bash

Frameworks & Libraries: Node.js, Express.js, FastAPI, Pandas, NumPy, ReactJS, Svelte, TensorFlow, Matplotlib

Cloud & DevOps: AWS (EC2, ECS, Lambda, S3), Git, Docker, Kubernetes, Helm, Linux

Databases & APIs: PostgreSQL, MongoDB, GraphQL, REST APIs

EXPERIENCE

Toronto Stock Exchange

Software Engineer

Toronto, ON

May 2026 - Aug 2026

- Wrote Bash, Python, & SQL scripts to process **millions of monthly transactions** across **30+ clients** on TMX's AlphaX US exchange, delivering reconciliation data for clients & internal business teams
- Designed & built a **Bash/Python pipeline** querying an Oracle DB & generating DOCX/XLSX/PDF/CSV reports for downstream export, replacing SAP BOE for **40+ internal reports** & cutting licensing costs
- Resolved production failures in **Lambda & S3** pipelines handling billing of **100+ MX/CDCC clients**
- Developed & tested changes to **Helm charts** & Python scripts to add selective-replay capability to our Workday export job, enabling **idempotent reprocessing** without full re-runs

Hack The North

Backend Developer

Waterloo, ON

Feb 2026 - Present

- Designed & built a hacker-judging platform (TypeScript, GraphQL) serving **1,000+ hackers** across **~300 projects** — auto-synced Devpost & Notion data into Postgres to **bypass Notion's API limit** under high traffic
- Built a **sponsor-to-website content pipeline** using GitHub Actions to automatically fetch and publish submitted sponsor job postings & logos to hackthenorth.com, **saving FE team 15+ hours** of work
- Built a Typescript pipeline syncing **thousands of Slack-submitted event ideas** into a centralized Notion database, eliminating manual triage

UWBlueprint (Mississippi Farm to School Network)

Software Developer

Waterloo, ON

Jan 2026 - Present

- Developed a full-stack **Svelte** webapp in an **Agile team** of **10** to connect Mississippi farms to school food programs
- Designed & **optimized PostgreSQL** schema with **indexing strategies & foreign keys** to structure user data
- Engineered CRUD services using **Prisma** and **GraphQL** to support communication between farmers & educators

Minvest Finance

Co-Lead Software Engineer

Remote

Mar 2024 - Feb 2025

- Led a **team of 3** through full **SDLC** to ship a financial literacy platform using **ReactJS & TypeScript**
- Developed **Python APIs** to manage user data & application logic for a **paper-trading platform**
- Containerized & deployed microservices** using **Docker, AWS EC2, & ECS** to support live web applications
- Reduced cloud costs by a minimum of **CA\$580+ per year** through resource optimization & monitoring

PROJECTS

DiscoDig - Discord Chat Analytics Tool | *Typescript, plotly.js, ESBUILD, Chrome Extension* [GitHub](#), [DiscoDig](#)

- Published a **Chrome Extension** with **400+ installs** enabling users to analyze **millions of Discord messages**
- Created Typescript pipelines to process, aggregate, and validate large client-side datasets
- Built an **analytics dashboard** using HTML/CSS, featuring word clouds, reply times, usage trends, ping frequency, & time graphs

vibesB2B - HackGT (Georgia Tech) | *Flask, AI/ML, Computer Vision, Recall.ai, Webhooks, ngrok* [Devpost](#)

- Developed an AI-powered app to analyze audience microreactions for live **speaker feedback & automated CRM**
- Built a **Flask ingestion pipeline** to process live audio/video streams for downstream ML analysis
- Placed **3rd overall** out of **1500+** participants
